

# The Ball Screw!

The heart and soul of The PressOne

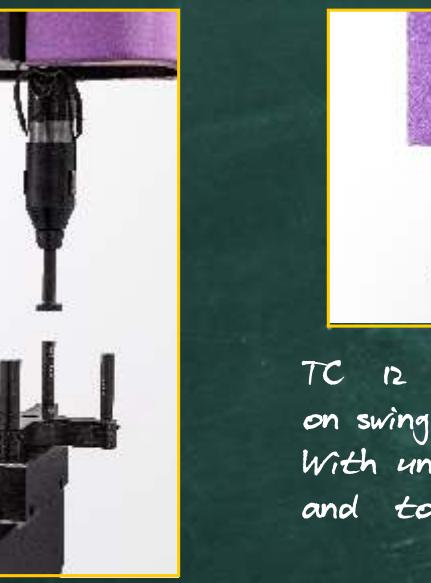

# PressOneSert P1s-5

Modern technology for fastener insertions  
powered by servo motor driven ball screw

- Requires only electricity
- No oil, no hydraulics
- Insertion force adjustable
- Adjustable ram stop
- Rapid cycle speed
- PressOne TC12 Control
- Easy and simple programming by 12" touch screen
- Consistency and extremely fast set up time

**LOW OPERATING COSTS.** Thanks to the modern servo drive system, the average power consumption of the PressOneSert is less than 0.4 kW. The absence of a hydraulic system eliminates expensive hydraulic fluid changes, spare parts, valves and maintenance expenses, common to hydraulic fasteners.

TC 12 touch screen control on swing arm for easy operation. With unlimited program capacity and tooling wizard database.

Operator friendly and powerfull TC 12 control. Easy to use and also allows modifications according customer demands. With programmable insertion speed for soft and fragile parts.
